

Uniform Tracker

Complete User Guide

Every dashboard, every workflow, manual vs automated — from start to finish

Product: Silverleaf Uniform Tracker

Five campuses: Usa River · Arusha Town (AM) · Kijenge · Ilboru · Boma

Version: September 2026 · Demo password: Silverleaf@2026

1. What this project is

The **Silverleaf Uniform Tracker** is a school operations app that replaces Excel and Google Sheets for managing uniforms across five campuses. It tracks:

- **Stock** — how many uniforms (by item and size) sit at each warehouse, shop, and campus
- **Orders** — parent coupons in a fair queue (FIFO)
- **Money** — what was bought, sewn, sold, and what to order next year
- **Movement** — every time stock moves, who moved it, and why

What it replaces: The Master Excel sheet and 2026 Uniform Analysis

workbook. Excel stays as a backup until each campus is trained; after go-live,

this app is the official record.

Technology (for reference): Web app (Next.js), works in a browser. Demo uses SQLite on one computer; production will use PostgreSQL when all campuses are live together.

2. The big picture — how everything connects

Every uniform follows the same physical path:

MAKE or BUY → MAIN warehouse → Distribution → Campus store → Parent collects kit ↑
 ↓ Loveness sews Finance plans next year City supplier (P0) ↑ Year-end analytics

Six connected loops (not separate tools):

#	Loop	Plain English
1	Production (SLM)	Loveness logs cloth and sewing; finished pieces land in MAIN
2	Parent online order	Parents order on phone/computer; FIFO queue by order date
3	FIFO queue	First ordered, first served — payment date does not jump the line

4	Distribution	Imani ships from MAIN or shop to campus stores
5	Year-end analytics	Freeze what was issued; learn which sizes moved
6	Predictive buy plan	Plan next year's city purchase from enrolment and history

3. People, roles, and who sees what

Role	Named operator (demo)	Home screen	Scope
STORE	Imani	Home (4-stage map)	Whole network — all campuses, all stock, all DNs
TAILOR	Loveness	Home (sew/cloth)	MAIN + Usa River shop only
FINANCE	Finance desk	Money	All money, plans, POs (with Imani)
CEO	Leadership	Briefing	Read-only overview
ADMIN	Usa / AM admins	Campus Home	Own campus only; can request stock
HEAD_TEACHER	Kijenge / Ilboru / Boma HTs	Campus Home	Own campus only; can request stock
PRINCIPAL	Campus leadership	Campus Home	Own campus, read-only
PARENT	Guardian	Parent portal	Own children's orders only

Login: Staff use email + password. Parents use the child's **registration number** (e.g. SLA/UR/2023/312), which creates or opens the family account.

4. Manual vs automated — what the computer does for you

In this guide:

- **MANUAL** = a person must click a button or enter data
- **AUTOMATIC** = the system calculates or updates without extra steps
- **MANUAL → AUTO** = you trigger one action; the system does the rest

Action	Type	What happens automatically
Complete sewing job	MANUAL → AUTO	Stock added to MAIN; sewing cost recorded
Receive PO into MAIN	MANUAL → AUTO	Stock up; finance expense posted; PO status updated; audit logged
Post delivery note (DN)	MANUAL → AUTO	Stock down at source, up at campus; request marked fulfilled
Record parent payment	MANUAL → AUTO	Order status → PAID when fully paid; FIFO position unchanged
Issue kit to parent	MANUAL → AUTO	Campus stock down; order → FULFILLED or PARTIAL
FIFO queue position	AUTOMATIC	Counted from order date among open coupons
Low stock alerts	AUTOMATIC	Compared to reorder points; shown on Home and Alerts
Cloth shortfall alert	AUTOMATIC	Open sewing jobs vs cloth on hand
OVERALL buy plan math	AUTOMATIC	Enrolment × pack – campus stock – MAIN stock
Draft PO from plan	MANUAL →	Lines pre-filled from plan; you still send and

	AUTO	receive manually
Parent payment (cash/Lipa)	MANUAL	Money moves outside the app; staff records channel + reference here
Mark kit ready + WhatsApp	MANUAL	Staff clicks ready; link opens WhatsApp/SMS — message not auto-sent by server
Year-end snapshot	MANUAL	Finance/Imani clicks "Run year-end" when year is closed
Transfer MAIN → shop	MANUAL	Imani chooses qty; stock ledger updates automatically
Void delivery note	MANUAL → AUTO	Stock reversed; campus request reopened if linked

5. The complete workflow (start to toe)

Phase A — Supply (getting uniforms in)

1. **Cloth desk** — Loveness logs fabric/jora bought **MANUAL**
2. **Sew desk** — Create job → Complete → pieces into MAIN **MANUAL → AUTO**
3. **Buy desk (PO)** — Create PO → Send → Receive into MAIN **MANUAL → AUTO**
4. **Stock desk** — View balances; transfer MAIN → Usa shop **MANUAL**

Phase B — Campus replenishment

1. **Ask desk** — Campus admin/HT requests stock from Imani **MANUAL**
2. **DNs desk** — Imani posts delivery note MAIN/shop → campus **MANUAL → AUTO**
3. **Print DN** — Paper for campus receiver **MANUAL**

Phase C — Parent demand

1. **Parent portal** — Parent places order (FIFO locked) **MANUAL**

2. **Orders desk** — Staff records payment **MANUAL**
3. **Orders detail** — Mark kit ready → Issue kit **MANUAL → AUTO**
4. **Print coupon** — Window paper **MANUAL**

Phase D — Money and next year

1. **Money desk** — Budget, expenses, margins **AUTO** (aggregated from operations)
2. **Year desk** — Run year-end, run forecast **MANUAL trigger**
3. **Plan desk** — OVERALL buy plan → Draft PO **MANUAL → AUTO**
4. Back to **Buy desk** — Send and receive next year's city order

Phase E — Oversight (always on)

- **Home** — Live counts linking to each phase
- **Alerts** — Low stock and cloth shortfall
- **Briefing** — KPIs for leadership
- **Audit log** — Who changed what

6. Dashboard-by-dashboard guide

6.1 Home — /desk

Nav label: Home · **Who:** All staff (different view per role)

What it does: Starting point. Not a chart wall — a *control tower* with live numbers that link to where work is stuck.

Role	What you see
Imani (STORE)	4 cards: Tailoring → Central inventory → Distribution → Campuses & parents; low stock alerts; parent cancel feed
Loveness (TAILOR)	Open sewing jobs, shop stock, cloth alerts
Campus staff	Campus KPI tiles — orders waiting, stock flags
Finance	Link to Money desk
CEO	Link to Briefing (read-only)

Connects to: Sew, Stock, DNs, Orders, Alerts, Briefing, Train

Manual: Click a card to go fix that area. **Auto:** Counts refresh from live data.

6.2 Cloth — /s_{lm}

Who: Loveness, Imani · **Purpose:** Raw materials — jora, fabric batches, labour costs.

Functions: Log metres bought; see cloth shortfall vs open sewing jobs.

Connects to: Sew (consumes cloth) · Alerts (shortfall) · Money (material expenses)

MANUAL: Enter each batch. **AUTO:** Shortfall calculation.

6.3 Sew — /sewing

Who: Loveness, Imani · **Purpose:** Daily sewing jobs (SKU + size + qty).

Functions: Create job → Complete → stock lands in MAIN; sewing P&L.

Connects to: Cloth · Stock (MAIN up) · Money (labour/material) · Home (job count)

MANUAL: Create and complete jobs. **AUTO:** SEW_IN stock move on complete.

6.4 Buy (Purchase Orders) — /purchase-orders

Who: Imani, Finance · **Purpose:** City supplier orders. See Section 7 for full PO guide.

Connects to: Plan (draft PO) · Stock (MAIN) · Money (expenses, committed budget) · Audit

6.5 Stock — /stock and Stock Moves — /stock/moves

Who: Imani, Loveness, campus staff (own campus only)

What it does: On-hand by location + SKU + size. Low-stock flags. Imani can adjust and transfer MAIN → SHOP_USA.

Connects to: Buy (receive) · Sew (SEW_IN) · DNs (campus in/out) · Orders (issue) · Alerts

MANUAL: Adjust, transfer. **AUTO:** Every other desk updates stock through one ledger.

6.6 Ask (Campus Requests) — /requests

Who: Campus admin/HT create; Imani sees all; Principal view only

What it does: Campus asks Imani for stock. Edit or cancel while OPEN.

Connects to: DNs (fulfillment) · Home (open request count) · Distribution queue

MANUAL: Create, edit, cancel request. **AUTO:** Status → FULFILLED when Imani

posts DN.

6.7 DNs (Distribution) — /distribution

Who: Imani creates; campus staff view incoming

What it does: Delivery notes from MAIN or shop to campus store. Void if wrong campus (before campus issues to parents).

Connects to: Ask · Stock · Print DN · Audit

MANUAL: Post DN, void DN. **AUTO:** Two-sided stock move; request fulfilled.

6.8 Orders — /orders and Order Detail — /orders/[id]

Who: Store, Finance, CEO, campus staff (scoped)

What it does: All parent coupons; FIFO queue; payment; kit ready; issue; staff cancel/edit before issue.

Connects to: Parent portal · Stock · Money · Coupon print · Briefing · Home

MANUAL: Pay, ready, issue, cancel. **AUTO:** FIFO position, status changes, stock on issue.

6.9 Money — /finance

Who: Finance, Imani, CEO (read)

What it does: Budget vs committed POs vs received; parent payments; issued margin; sewing savings; expense list.

Connects to: Buy · Orders · Sew · Plan · PO commitment math

AUTO: Aggregates from operations. **MANUAL:** Edit/delete expense (finance-side correction only).

6.10 Plan — /sizes

Who: Finance, Imani, CEO (read)

What it does: Hottest/dead sizes; class fit chart; enrolment; OVERALL 2027 buy plan; Draft PO from plan; CSV export.

Connects to: Buy · Money · Analytics (forecasts) · Year

AUTO: Plan math. **MANUAL:** Enrolment/prices edit; draft PO button.

6.11 Catalog — /catalog

Who: Finance, Imani, CEO (read)

What it does: Master list of uniform SKUs — code, colour, sizes, buy/sell prices. Feeds PO lines and parent order dropdowns.

Connects to: Buy · Parent portal · Plan · Stock (SKU definitions)

6.12 Year — /analytics

Who: Finance, Imani; CEO read-only

What it does: Year-end snapshot (freeze year); forecast for next buy plan.

Connects to: Plan · Buy (next cycle)

MANUAL: Run year-end and forecast buttons.

6.13 Briefing — /reports

Who: CEO home; all leadership roles

What it does: KPI reports; CEO briefing with campus drill-in; print/WhatsApp pack.

Connects to: Reads from Orders, Stock, Money, Sew — no writes

AUTO: All numbers live from database.

6.14 Alerts — /alerts

Who: Everyone (scoped by role/location)

What it does: Full list of low stock vs reorder points and cloth shortfall.

Connects to: Same data as Home alert tiles · Stock · Cloth · Buy (action)

6.15 Log (Audit) — /audit

Who: Imani, Finance, CEO

What it does: Immutable trail — receive, pay, distribute, issue, cancel, void.

Connects to: Every write action across the app

6.16 Train — /train

Who: All staff (no nav pill — open by URL or Home link)

What it does: Usa River walkthrough in English and Kiswahili.

6.17 Parent Portal — /parent

Who: Parents only · Separate from staff console

What it does: Order online; FIFO queue position; edit/cancel before pay; siblings; size guide; "Come collect" when ready; offline queue.

Connects to: Orders desk (same coupons) · Coupon print

7. Purchase Orders (PO / Buy desk) — deep guide

PO = Purchase Order — not a shop checkout. It is how Silverleaf orders

ready-made uniforms from city suppliers (e.g. City Sportswear). Every city buy

enters the network at **MAIN warehouse only**.

7.1 Who and where

- **Nav label:** Buy
- **URL:** /purchase-orders
- **Users:** Imani (STORE) and Finance only

7.2 PO lifecycle (statuses)

DRAFT → Mark sent → SENT → Receive into MAIN → PARTIAL or CLOSED ↓ ↑ Edit / Cancel (partial receive OK – PO stays open) ↓ CANCELLED (abandoned draft – no stock or expense impact)

Status	Meaning	What you can do
DRAFT	Created, not sent to supplier	Edit lines, Cancel, Mark sent
SENT	Supplier has the order	Receive into MAIN
PARTIAL	Some qty received, more expected	Receive remaining qty
CLOSED	All lines fully received	Read only
CANCELLED	Draft abandoned	Read only; excluded from budget commitment

7.3 Page layout

1. **PO cards** (newest first, 25 per page with pager)
2. **Raise PO form** (always at bottom)

Each card shows: ref, supplier, who raised it, status badge, line table (SKU, size, qty, received, unit cost), ordered total vs received cost.

7.4 Creating a PO — two ways

Way A — Manual (Raise PO form)

1. Pick **Supplier**
2. Add lines: SKU · Size · Qty · Unit cost (pre-filled from catalog buy price)
3. Click **Save draft**

MANUAL: Every field. **AUTO:** Ref number (PO-...) assigned.

Way B — From Plan desk

1. Go to **Plan** (/sizes) → OVERALL buy plan (2027)
2. Pick supplier → **Draft PO from plan**
3. System calculates: enrolment × pack per child – campus stock – MAIN stock
4. Redirects to Buy desk with lines pre-filled (ref PO-PLAN-2027)

AUTO: Line calculation. **MANUAL:** Send and receive.

7.5 Receiving goods

1. For each line, enter qty arriving today (default = all remaining)
2. Click **Receive into MAIN**

Hard rule: Receive always goes to MAIN — never directly to a campus.

MANUAL → AUTO: You enter qty; system updates MAIN stock, posts finance expense for received value only, updates received column, sets PARTIAL or CLOSED, writes audit.

7.6 What PO connects to

After receive...	Desk	What changes
Stock up	Stock	MAIN balances increase
Expense posted	Money	SUPPLIER expense; committed budget drops
Trail	Audit	RECEIVE logged
Next step	Stock → DNs	Imani transfers to shop or ships to campus

7.7 Finance and PO money

- **Committed** = value on open POs not yet received (DRAFT + SENT + PARTIAL)
- **Received** = value already received from POs
- **Remaining budget** = allocated budget – received – committed

Expense posts **on receive**, not on send — Finance reflects actual goods in.

7.8 PO rules (never break these)

1. City PO receive → **MAIN only**
2. Partial receive is normal — PO stays open until all lines complete
3. Only DRAFT POs can be edited or cancelled
4. Campus stock comes from **Delivery Notes**, not from PO receive

8. Dashboard correlation map

Use this table when training: "When I do X on desk A, what happens on desk B?"

From desk	Action	To desk(s)	Effect
Cloth	Log fabric	Sew, Alerts	Shortfall recalculated
Sew	Complete job	Stock, Money	MAIN +qty; labour expense
Buy (PO)	Receive	Stock, Money, Audit	MAIN +qty; expense
Stock	Transfer	Stock moves	MAIN –qty, shop +qty
Ask	Create request	DNs, Home	OPEN request in Imani's queue
DNs	Post DN	Stock, Ask, Audit	Source –qty, campus +qty; request FULFILLED
DNs	Void DN	Stock, Ask	Stock reversed; request reopened
Parent	Place order	Orders, Home	FIFO queue +1
Parent	Cancel (unpaid)	Orders, Home, Audit	CANCELLED; leaves queue
Orders	Record payment	Money, Parent	PAID; queue position unchanged
Orders	Issue kit	Stock, Money, Analytics	Campus –qty; FULFILLED/PARTIAL
Plan	Draft PO	Buy	Pre-filled PO lines
Year	Run forecast	Plan	SizeForecast for next buy

All writes	Any mutation	Audit	Logged permanently
---------------	-----------------	-------	--------------------

9. Print surfaces and parent portal

URL	Purpose	Who prints
/coupon/[id]	Parent coupon for window	Staff, parent
/delivery-note/[id]	DN for campus receiver	Imani
/briefing	CEO KPI pack	Leadership
/size-chart	Size chart for shop wall	Loveness, campus

10. Rules everyone must know

1. **FIFO** — queue by order date, not payment date. Order first, pay later.
2. **MAIN first** — all city buys and sewing output land in MAIN before campuses.
3. **Imani only** creates network delivery notes.
4. **Campus walls** — staff see only their campus (except Imani, Finance, CEO).
5. **Draft = editable** — PO, request, parent order (before pay). After send/receive/issue, use void or Finance correction with audit trail.
6. **One stock ledger** — every movement logged; stock cannot go negative.
7. **Payments are manual record** — Lipa/cash happen outside the app; staff records channel + reference.

11. Training order for new users

Session	Audience	Duration	Desks to cover
1	Imani +	45 min	Home, Cloth, Sew, Buy, Stock, Ask,

	Loveness		DNs, Orders
2	Campus admin/HT	30 min	Home, Ask, Orders (pay + issue)
3	Finance	20 min	Money, Plan, Year, Buy
4	Parents	15 min	Parent portal, FIFO, size chart
5	CEO	10 min	Briefing only (read-only)

12. Quick reference cheat sheet

SUPPLY Loveness: Cloth + Sew → MAIN Imani: Buy (PO) → Receive MAIN → Stock MOVE
 Campus: Ask (request) – edit/cancel while OPEN Imani: DNs → campus store – void if
 wrong SELL Parent: Order online (FIFO by order date) Staff: Pay → Kit ready →
 Issue kit PLAN Finance: Money → Plan → Year → Draft PO → Buy WATCH Home (counts) ·
 Alerts (low stock) · Briefing (CEO) · Audit (who did what) RULES FIFO · MAIN first
 · Imani ships network · Draft editable
